COMP9900 Information Technology Project

T2, 2020

Retrospective A

Group name: Salted Fish

z5108173   Xiaowei Zhou   Scrum Master/Developer

z5177443   Keyu Yang   Developer

z5243620   Lisha Jing   Developer

z5225777   Nan Zhao   Developer

z5222641   Qingbei Wu   Developer

Retrospective:

Good Process
Seperation of frontend / backend API.
Well formatted/structured backend code structure.
External config files for configurable server. (YAML config files)
Standalone environment for backend. (Python virtual environment)
Use the latest technology stacks.(React,Redux,React-hook,Materialize UI)
Well page layout and frontend code structure.

Not Good	To Try (Related to Not Good part)	Assign
Progress reporting is not enough by using github issues/jira - may need to increase reporting in IM.	Report to everyone after completing an issue/functionality in IM.	ALL
Code comment/doc is not enough to understand easily.	More documentation for backend code/API	X. Zhou
Backend API return is not consistant and simple enough.	Directly return mapped values in future API instead of raw values.	X. Zhou L. Jing Q. Wu
Backend class structure does not have enough / proper accessors for functionalities.	Add more accessors for classes/objects (factory method?)	L. Jing
Front-end Jira/Github subtasks/issues progress update not on time.	Increase frequency of jira/github tracking update for frontend tasks.	K. Yang N. Zhao
Time arrangement for some jobs is not sufficient so sprint1 is quite busy.	Improve task allocations for sprint3/4 by re-organise some allocated tasks/user stories.	ALL

Attendence Information:

Date	10 July 2020
Time	18:55 - 20:15
Platform	Zoom Meeting
Member	Attendence (Yes/No/Late)
Xiaowei Zhou	Y
Keyu Yang	Y
Lisha Jing	Y
Nan Zhao	Y
Qingbei Wu	Y
